Beta Release*
11/15

Q3 & Q4 FY15
Release 1 & 2
Completed Common Services Infrastructure
Released
9/15

*Beta Release is a pre-release of software in the Production environment that is given out to a large group of users to try under real conditions. Beta versions have gone through acceptance testing and are generally fairly close in look, feel and function to the final product. Beta version of the software will co-exist with currently used or live software until stakeholder and IAE acceptance.
